Case study – Holy Family Nursing Home

Customer issue

At Holy Family Nursing Home, they were looking for a solution to reduce the time taken by staff to record patient information via paper records and storing these records digitally.

Solution

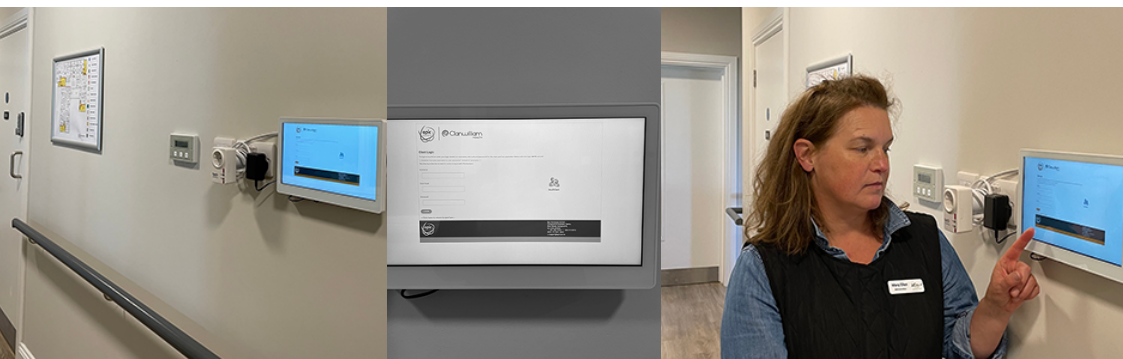

After in depth consultation with the client, AD Series provided a solution utilising our **Octab 3288 range** with Android 8.1, 2GB RAM and 16GB storage. With the clients additional need to have the tablet connected via ethernet, a customised RJ45 port was added to the tablet. With the vesa mount included, the tablet was placed outside of each patient's room to allow for the staff to enter, record vital patient information. Allowing Holy family Nursing Home staff to digitise all their data records, stored digitally and having these record readily at a click for each member of staff.
